

Ayush Roy

ASSOCIATE ENGINEER | APPLIED ML BUILDER

Bhubaneswar, Odisha, India | ayushroy.dev@gmail.com | github.com/yorayriniwnl | linkedin.com/in/yorayriniwnl

PROFILE

I build ambitious product systems where polished interfaces meet realtime backends, applied machine learning, and the physical world.

SELECTED WORK

Yor Talks - Full-stack product engineering

React, Vite, Express 5, Socket.IO, PostgreSQL, Drizzle, Redis

Full-stack social product prototype. Current repository status: code-ready, deployment blocked. Local readiness evidence does not imply a verified public service.

Yor Helios - System concept / applied ML / realtime interface

Python, FastAPI, WebSocket, anomaly detection, Docker

Experimental energy-intelligence operator demo with deterministic sample telemetry. Illustrative signals are not production field telemetry.

Texture Forensics - Applied ML study / evaluation

Python, OpenCV, LBP, GLCM, SVM

Classical image-forensics study. Repository reports 78.5% accuracy on a specific 107-image holdout; the result is not generalized beyond that evaluation.

Yor Zenith - Interface direction / product experience

Next.js, TypeScript, Three.js, Recharts, Motion

Experimental solar intelligence interface. Repository attribution for architecture/development is preserved separately; this resume claims Ayush's interface/product contribution only.

EXPERIENCE

Bharat Sanchar Nigam Limited (BSNL) - Telecom & Data Network Intern

June 2026 | Chennai (Hybrid)

Completed an RGMTTC-certified four-week program in telecom, data-network systems, and infrastructure.

EDUCATION

KIIT Deemed University - B.Tech in Computer Science and Communication Engineering

2023-2027 (Expected) | Bhubaneswar, Odisha

TECHNICAL FOCUS

Realtime systems	Socket.IO, WebSocket, REST contracts, durable state, Redis worker paths
Applied ML / vision	OpenCV, LBP, GLCM, SVM, evaluation framing
Product engineering	TypeScript, React/Next.js, Express, PostgreSQL/Drizzle, interface architecture

Evidence note: project statuses and metrics are intentionally scoped to repository evidence checked on 8 September 2026. No employer is inferred from the public Associate Engineer title.
